

Poultry Byproduct Meal
PBPM-50
PRODUCT SPECIFICATION

Description

Poultry Byproduct Meal™-50 is a light to dark brown colored, fine texture poultry meat and bone meal, and is a source of highly bioavailable protein/amino acids, fat, calcium, and phosphorus for poultry, swine, and pet food diets, which has been treated with an anti Salmonella and antioxidant products to preserve quality.

Benefits

The addition of PBPM-50 to all animal diets can provide nutrients essential for growth, muscle and bone development, an economical source of protein for ruminants, and improve digestibility of pet food diets.

Typical Analysis

- Protein 50.00 % minimum
- Fat 32.00 % maximum
- Fiber 3.00 % maximum
- Ash 4.20 % maximum
- Calcium 0.75 % minimum
- Phosphorus 0.65 % minimum
- Humidity 10.00 % maximum
- Granulometry 5.00 % maximum retention in mesh No. 10 ASTM
- Peroxide index 5.00 meq maximum
- Digestibility 80.00 %
- Salmonella Negative
- E. coli Negative

Physical Properties

Meal, light to dark color brown.

Application

Use as a source of highly bioavailable source of protein/amino acids, energy, calcium, and phosphorus in animal diets.

Storage

Store in a cool and dry place.
